

Teacher's Guide – Numbers Review

See student worksheet below.

This material is designed to test numbers using the teacher's voice. You may wish to make a recording of the numbers using more than one voice.

1. Suggested numbers to read out: (easier versions in brackets)

-5 (-5 degrees C)

2-0 (2-1)

8.50 (\$8.50)

0.234 (2.234)

709

0044 1323 891105

2 2/5 (1 1/2)

2/ 3/ 1903 (2/ 3/ 1933)

2. Choose which of each of the two options to read out depending on which things students found difficult above.

3. Read one of the two choices from the student worksheet.

Numbers Review

1. Listen and choose what kind of number is being said

- | | |

1 _____ 2 _____ 3 _____ 4 _____
5 _____ 6 _____ 7 _____ 8 _____

2. Listen again and write each number down

3. Listen and choose the correct number below

- a) 0039 766 222
b) 0039 776 622

- a) 15
b) 50

- a) $13 + 15 = 28$
b) $30 - 15 = 15$

- a) 2,000,000,000
b) 2,000,000,000,000

- a) 1,005
b) 1.005

- a) £7.95
b) £795

- a) In the year 1903
b) In the year 1930

- a) 1/ 1/ 02
b) 3/ 7/ 02

4. Listen again and check

Pairwork Student A

1. Working together, say these numbers

12,520,000 people

07:35

Thurs. 31/7/1970

$\frac{3}{4}$ of 1 percent

0.0035%

(0044) 01323 645342

It's on the 7th floor

2. Dictate these phrases to your partner, and write down the phrases they dictate to you.

a) 1250 people

b) _____

c) since 1990

d) _____

e) when I'm 62 or 63

f) _____

g) about 15,000 miles a year

h) _____

i) -5 degrees C

j) _____

k) about 1 ½ hours

3. What questions could be asked to obtain the numbers you have just dictated? E.g. How many people work in your company/ live in your village? In pairs, write one question down for each number.

4. Change pairs, ask the questions you just wrote to your new partner, and write down their answers.

Pairwork Student B

1. Working together, say these numbers

12,520,000 people

07:35

Thurs. 31/7/1970

$\frac{3}{4}$ of 1 percent

0.0035%

(0044) 01323 645342

It's on the 7th floor

2. Dictate these phrases to your partner, and write down the phrases they dictate to you.

a) _____

b) 3 people

c) _____

d) by 2.53%

e) _____

f) 120 kph

g) _____

h) 3-0 against Manchester United

i) _____

j) on the 6th floor, in room 209

k) _____

3. What questions could be asked to obtain the numbers you have just dictated? E.g. How many people work in your company/ live in your village? In pairs, write one question down for each number.

4. Change pairs, ask the questions you just wrote to your new partner, and write down their answers.
